D7/381 p.256 JULY, 1968

before you can serve a meal

. . . a lot of important things must happen. You must be kept informed of all the advances in food products and preparation methods. You must have complete information on food costs. You must have frozen food delivery service you can count on. You must be assured of dependable quality and continuity of supply.

A Certified Full-Service Wholesaler will handle all the "musts" for you.

He can because he must subscribe to a seven-point code to earn this emblem.

certified full service wholesaler

NFFA NATIONAL FROZEN FOOD ASSOCIATION

This is the seven-point code established for acceptance as a Certified Full-Service Wholesaler.

1. Warehouse facilities of sufficient size, with adequately controlled temperatures (zero degrees or lower).
2. Proper space, held at proper temperatures, to assemble and/or fill orders.
3. Properly insulated and refrigerated trucks or delivery containers.
4. Adequate and bonafide merchandising force of qualified personnel who devote their time to selling, merchandising, promoting and sampling frozen products.
5. Adequate inventory to properly serve any or all customers in a given market.
6. Suitable facilities for demonstration of frozen foods.
7. Pledged to sell, promote, merchandise, advertise and in every way assist the growth of the industry.

THE NATIONAL FROZEN FOOD ASSOCIATION

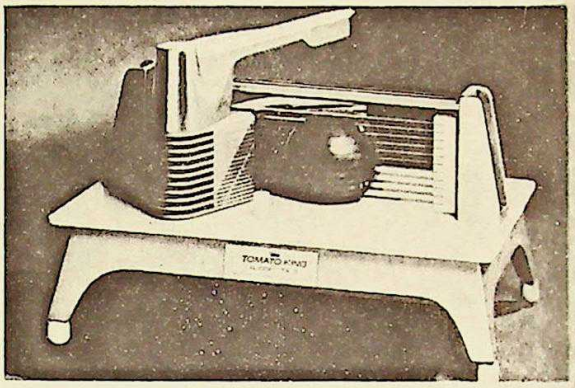
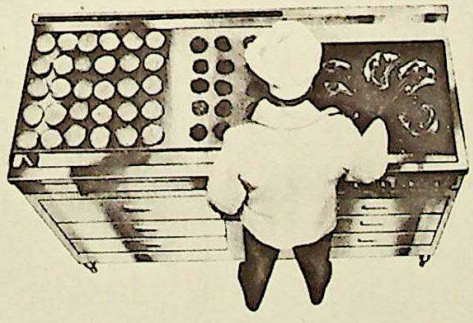
NEW DIMENSIONS IN PRODUCTS



QUICK VEGETABLE SLICER

A tomato slicer has been designed for heavy-duty use in institutional kitchens. With just a flick of the handle, the machine will slice a whole tomato in one second. It is mounted on a lucite base, which resists chemical reaction to tomato acids. The machine is available with tempered stainless steel blades in cutting sizes of 3/16 in., 1/4 in., and 3/8 in. It can be used for slicing a number of other vegetables and soft foods, such as pickles, peppers, and boiled potatoes. *Walter Kidde & Co., Inc., IM, Belleville, N. J. 07109*

Circle number 347 on reader reply card for more information.



GRIDDLE-BROILER

A grill and broil center has been developed for quick food operations with limited working space. The combination griddle and char-broiler make up the top working surface. Griddle sizes are from 2-ft. to 7-ft wide and broilers from 2-ft to 4-ft wide. These units are built for installation on refrigerated bases to cut working floor area. *Wolf Range Co., IM, 19600 S Alameda St., Compton, Calif. 90221*

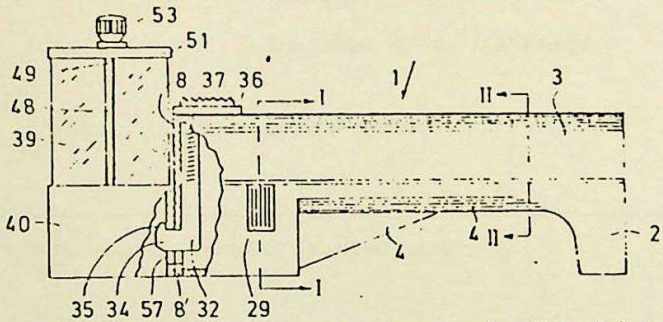
Food mincer for individual fresh storage containers - can be coupled to common drive motor in hand-held housing

TRAUTMANN G 09.04.77-DT-715956

(12.10.78) A47j-43/06

The food mincer is in the form of a grinder or grater tool (40) and is provided for each stay-fresh container but can coupled up when required to a common electrically operated drive (1). This drive can be stored in a handle-type housing (2, 3, 4) so that the individual processing tools can be fitted into driving connection with the front plate (8) of the housing. The hand-held appts. can thereby used in the kitchen and on the serving table.



To couple the tool to the drive mechanism a hooped slide bar (32) can be vertically displaceable near the front end of the drive housing where it can be held in its basic position by compression spring (37) and actuated by a press-button (36) on the top (3) of the housing. The slide bar (32) can have two coupling claws (34) which protrude beyond the front plate of the houising and have upward aligned lugs (35) which when the press-button is depressed, engage in slots (57) in a plate (55) on the tool. 9.4.77 as 715956. (29pp307).

Hamilton Beach Fields 6 New Electrics

WATERBURY, Conn. — Hamilton Beach has added a frankfurter fast cooker, a doughnut maker, a food processor, a yogurt maker, three bread-kneading mixer attachments and an iron with "power" and "ready" lights to the company's 1977 line.

Fast Frank, model 489, priced to retail at $14.95, cooks as many as six standard-sized hot dogs in two minutes on vertical stainless steel skewers. The unit requires no preheating, and is dishwasher safe once the cordset is removed.

Model 200 Donut Maker, designed to sell for $28.95, makes two doughnuts at a time. The unit, black with aluminum trim, takes about six minutes to heat, then cooks in seven minutes. It comes with a recipe booklet.

The Cuisine Machine is Hamilton Beach's $159.95 contribution to the food processor field. The motor of this processor, however, sits alongside the four-cup processing container.

THE MODEL 726 YOGURT maker, at $19.95, is called Culture Center, and makes six portions of yogurt in clear glass jars. On its orange and white base, Culture Center has a consistency guide to help time the yogurt for desired texture, with a time reminder dial to indicate when the yogurt should be removed.

SIDE BY SIDE — The motor rests next to the mixing bowl in the Cuisine Machine, Hamilton Beach's $159.95 food processor.

Three stand mixers have been upgraded with dough hooks for bread baking. Model 45 has an automatic timer, stainless steel bowls, nine speeds and a $79.95 price tag. Model 44 at $64.95 has most of the same features, without the timer. Model 43 comes with glass bowls, and will retail at $56.95.

The Smart Iron is a $39.95 unit with lights to indicate when the iron is plugged in and when it is hot enough to use. The steam iron has a self-cleaning mechanism and a non-stick soleplate with 65 vents.

Oster Smoke Detector Will Run on Battery

MILWAUKEE — The Oster Corp. will introduce a battery-operated smoke detector in July.

It will be a 9-volt, dual ionization unit that will have a test button and signal light.

Ken Sanville, company executive vice president of marketing, said shipments will begin in July. He added that there will be television advertising for the unit.

Although details have not been completed, Sanville said Suggested retail will be less than $50.

Economy a Factor

Retailers Find Basics Best Mom's Day Bets

By PRISCILLA SMART

NEW YORK — An uneasy economy and a dearth exciting new products pushed basic electrics and cookware to to the top of Mother's Day gift list this year, according to housewares retailers across the country.

While some merchants claimed to be coming out ahead in their battle with the tight economy last week, reporting increases in sales up to 40 percent, others, particularly in the Midwest, were having difficulty making last year's figures. All used the basics as ammunition.

"When there is a lot of concern about the economy, people buy basic housewares as gift items," said one buyer who pinpointed irons, toasters, and blenders as his volume items.

"People today have only so many expendable dollars, so they are going for basics," according to Marty Goodman, buyer for J. Byron's, Miami. Goodman, estimating that his sales were up about 40 percent over last year, attributed it to the promotion of basics. A Sunbeam toaster-oven at $17.99, Mr. Coffee at $26.99, as well as coffeemakers by Sunbeam and Proctor-Silex, were a few of the highlights.

"We've sold 300 to 500 pieces of every item we've advertised," he added.

ANOTHER EASTERN merchant who cited coffeemakers, toasters, and irons as his Mother's Day winners, said "This is the $45 to $50 range with a consumer rebate. Some department stores across the country promoted Cuisinart's machines with success.

Other high profile electrics included the Hamilton Beach iron at $19.99 and the Oster Kitchen Center at $129.99. One Midwest catalog-showroom included the 12-cup Mr. Coffee at $27.97 and West Bend's Pokey Pot at $54 in its top items. One Chicago department store noted good sales in Rival's 35-quart Crock-Pot at $14.99. Sunbeam's Vista frypan was good at another department store. A General Electric toaster-oven at about $30 was a favorite at a Western department store.

In personal care, hair dryers and curling irons were cited most often by retailers. One Western buyer also claimed success with Clairol's Foot Fixer and Gillette's Body Tender.

IN NON-ELECTRICS, cookware stole the show for this Mother's Day, with lines by Revere, Farber, Ecko, and Corning mentioned most often by merchants.

One East Coast discounter attributed his good figures to increased advertising and promotion of cookware sets. An eight-piece Farberware set at $39.99 along with a Corelle trio at $11.99 starred in his Mother's Day lineup.

Larry Fine, housewares buyer for Two Guys, Garfield, N.J., estimated that his business was ahead by 10 to 15 per cent and credited the increase to heavier cookware promotion.

Some New York area retailers featured the new convection ovens by Maxim and Cuisinart in Mother's Day ads. Buyers agreed that it is too early to gauge reaction to the ads, however one buyer said his ad was not expected to generate volume sales, but rather to introduce the product to the consumer.

Continued from Page One

also problematic.

At the heart of the woes for most producers, both electrics and basic, is the cost of aluminum. "We're beginning to see a situation where aluminum producers are not going to pull a shortage as in the past," remarked one large producer, "but they won't build up to meet demand to keep price up. They've slapped it to us terribly."

Executives at Northland, Club National Presto, McGraw-Edison and Mirro all said aluminum supplies "were getting tight," but also indicated they were having no problems — yet.

A few producers, anticipating continuing aluminum supply woes, are now trying to decide

manufacturers are worried. Aluminum in some forms has nearly doubled since January. Plastics have gone up 20 to 25 per cent since the beginning of the year, and a stainless steel price rise of about 10 per cent is anticipated for June or July. Copper has gone up 50 to 60 per cent.

Producers last week were spreading the word to their sales forces on resulting mid-year price increases. Announced so far are:

• Club Products' "preliminary work" on price changes for mid-year indicate that increases will range from about 2 to 8 per cent, said president Henry Mariani. He did not know what the average increase would be.

7 per cent, said vice president of marketing Bill Alldredge.

• Northland's Phil Sked, retail marketing director, said, "We'll have to go up around 7 per cent, if not more in certain selected items. Everyone's feeling the crunch."

• Proctor Silex will be "generally increasing in the area of 3½ per cent," said vice president of marketing Tom McNeil. "Raw materials are our biggest concern," he added, noting that Proctor uses about 1½ pounds of aluminum in every iron and 1 pound in each coffeemaker.

• Revere will be raising prices 6½ to 7 per cent on June 1, said Jack Eikenberb, president of the

Food Processors Seen Holding Lead As Gift Purchases

HFD REPORT

Food processors are expected to continue their reign as the top gift classification in housewares this year.

Buyers from New England to Texas and California say the same factors hold true in 1979 that made the machines the hit gift items in terms of both units and dollars last year for Mother, the bride, and Christmas.

Specifically, they say, processors are benefiting from the growing gourmet trend; have considerable snob appeal; are functional; save time and energy for today's working woman; and still have a low market saturation.

Most reliable industry figures available point up the rapid growth and low saturation of the category. Last year producers shipped about 2 million units. In 1977 the figure was only 700,000. In comparison, coffeemaker and iron shipments last year were 10 milliion and 9 million, respectively.

Cuisinarts models at about $200 were reported the gift-sales leaders last year, many buyers said, although action was also

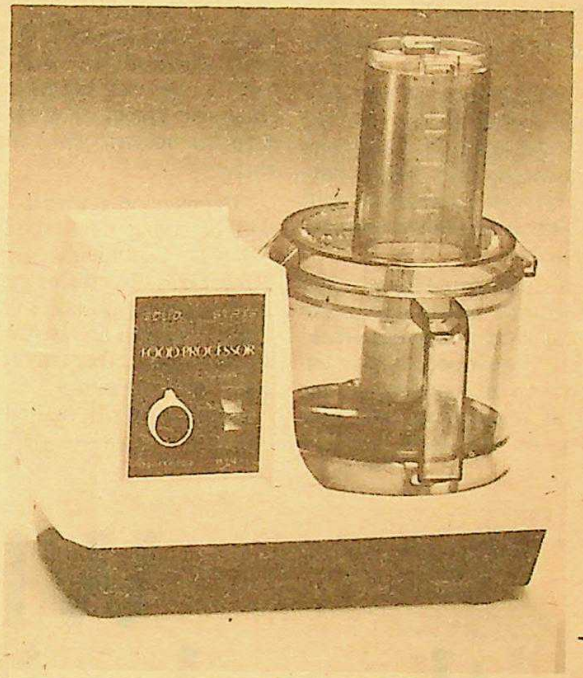
it will be a rough year in housewares and require dynamic promotion to maintain sales.

Among firms who voiced more ambitious projections were an Illinois department store that is looking for a 34 per cent gain; another Midwest store and a San Francisco department store, gearing for hikes of more than 15 percent. A New York operation is anticipating gains of from 10 to 15 per cent.

Most buyers contend that the gift business this year will center around basic items, since there has been little new merchandise on the market, either in electrics or non-electrics, to create consumer excitement. A possible exception are hot-air corn poppers, which are expected by some buyers to give food processors a strong run in sales, if not profit, in the gift sweepstakes. Convection ovens should be big, say some buyers, if they ever become available. Delivery of new lines at the show has yet to materialize.

In addition to food processors, retailers anticipate good mileage from steam irons, toaster-ovens, oven-broilers and drip cof-

Number 1



FOOD PROCESSORS were the top-selling gift housewares item at retail in 1978, and many retailers feel they will continue their reign in 1979, and though they may receive a challenge from toasterovens, steam irons and convection ovens.

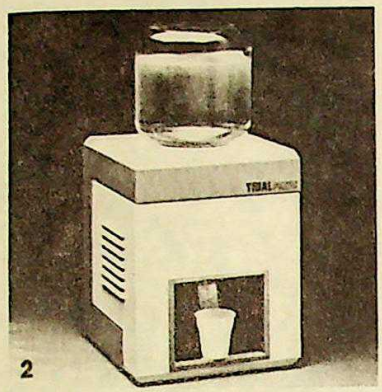
kneader, slicer, etc. is in the fact that it was designed by a computer. The aerodynamic motor/container can be installed on the wall or put on any kitchen top, or on a table, and contains all the necessary "terminals": whip, kneader, blender, potato peeler, vegetable chopper, immersion blender and mincer. Size 61 x 44 x 40 cms.

4. Macchina per caffè espresso "Kemi", produzione Bauknecht Italiana

Con "Kemi" (l'ultima novità della Bauknecht), oltre al caffè espresso, si possono preparare cappuccini, tè e altre bevande calde. La caldaia, in alluminio con rivestimento di ottone, contiene fino a litri 1,5 di acqua per un massimo di trenta tazze di caffè da 50 cc ciascuna.

4. "Kemi" expresso coffee machine by Bauknecht Italiana

With "Kemi" (the latest novelty by Bauknecht), as well as expresso coffee you can make cappuccino, tea and other hot drinks. The brass coated aluminium heater contains up to 1.5 litres of water for a maximum of thirty 50 cc cups of coffee.



2

5. Aspirapolvere, produzione Siemens

La calotta del motore dei nuovi aspirapolvere della Siemens è di Bayflex, un espanso integrale semirigido a base di materie prime della Bayer. L'uso di questo materiale, permanentemente elastico ed insonorizzante, consente una notevole riduzione del rumore. L'apertura di ventilazione applicata alla calotta assicura una buona circolazione dell'aria di raffreddamento del motore.

5. Vacuum cleaner by Siemens

The cover of the motor of this new vacuum cleaner by Siemens is in Bayflex, a semi-rigid integral foam made of Bayer raw materials. By using this material, which is permanently flexible and sound-proofing, there is a considerable drop in the noise. The ventilation aperture on the cover guarantees a good circulation of the motor cooling air. →

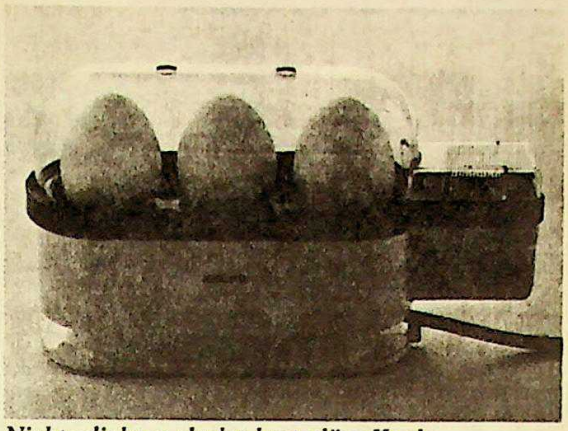
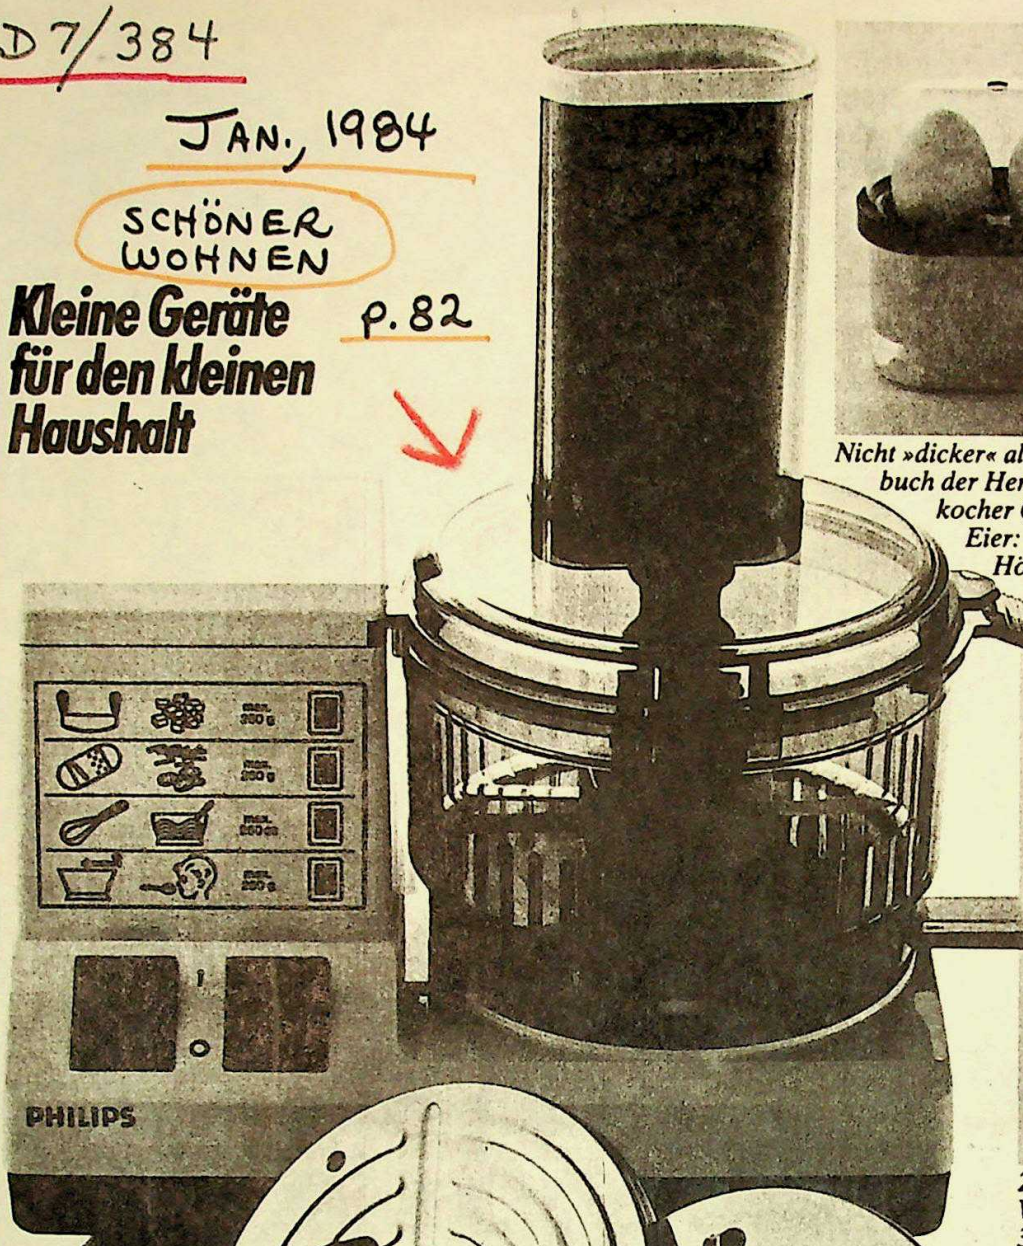
SCHÖNER WOHNEN

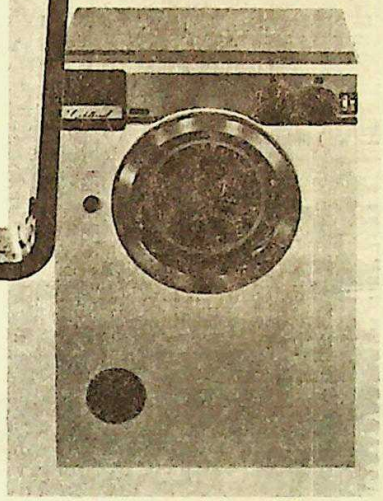
Kleine Geräte für den kleinen Haushalt

p. 82

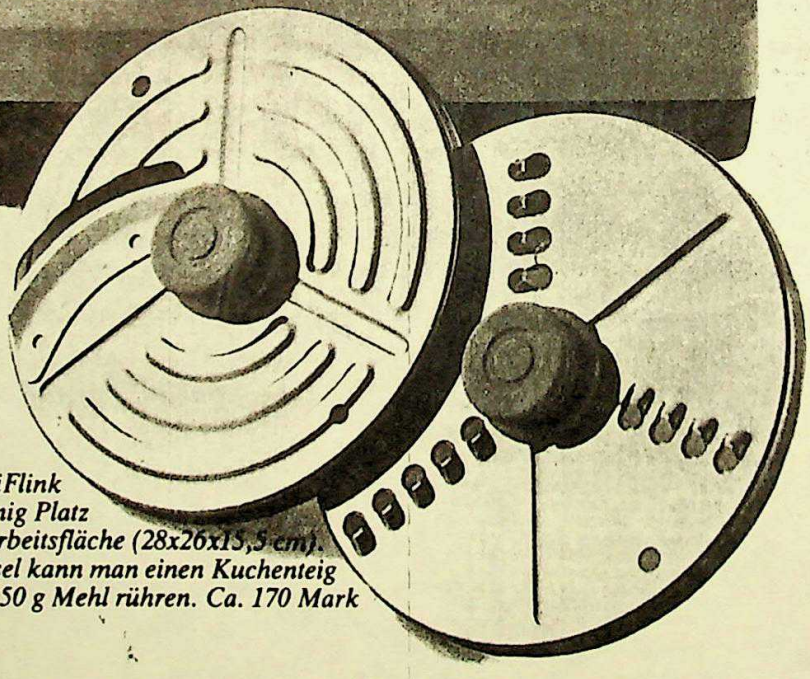


Nicht »dicker« als das legendäre Kochbuch der Henriette Davidis ist der Eierkocher Ovomat Trio für drei Eier: ganze 6,8 cm (Länge 21,5 cm. Höhe 12,8 cm). Ca. 45 Mark

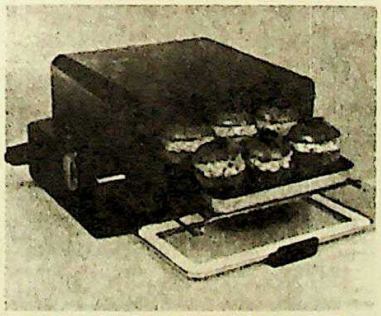




20 cm niedriger als andere Waschmaschinen: Goldkind 340. Maße: 65x45x39 cm (HxBxT). Ca. 1000 Mark



Die MiniFlink beansprucht wenig Platz auf der Arbeitsfläche (28x26x15,5 cm). In der Schüssel kann man einen Kuchenteig von 150 g Mehl rühren. Ca. 170 Mark



Der Backofen ist so klein, daß man ihn nach Gebrauch in den Schrank stellen kann. Maße: 18x30x35 cm (HxBxT). 100 Mark

nen. Das Gerät stellt man am besten in einen Raum, der sehr gut belüftet werden kann, oder man leitet die feuchte Luft durch einen Abluftschlauch nach draußen. 4 Kilogramm Trockenwäsche kann man in einer Füllung trocknen. Das dauert, je nach Gewebeart, Füllmenge und Schleuderleistung der Waschmaschine 60 bis 110 Minuten.

Der Kleinherd hat zwei Kochplatten – eine Blitzkochplatte von 18,5 cm und eine Normalkochplatte von 15 cm Durchmesser. In den Backofen passen normal große Kasten-, Gugelhupf- und Springformen. Das Backblech, das zur Standardausführung gehört, ist 42 mal 27 cm groß. Als Sonderzubehör gibt's einen Grill und ein Grillset mit Elektromotor.

Dental Products Are Latest Addition

Sunbeam Expands Health Care Line

HOUSEWARES® Special Report

CHICAGO—Northern Electric has a new and expanded Sunbeam Health Care line, including vaporizers, humidifiers, dental care products and heating pads.

Sunbeam Ultrasonic Cool Spray Humidifiers are engineered to provide ultra fine cool mist in a silent operation. Two models feature adjustable output nozzles, portable see-through water reservoirs and four-inch water refill opening. A built-in nylon cleaning brush and removable resuable air filter also are features.

Model 661 has a one-gallon capacity for 12-hour operation. Suggested retail is $98.24. Model 667 has a two-gallon capacity for 24-hour operation at a suggested retail price of $112.28.

Sunbeam's Evaporative Humidifiers humidify, clean and circulate the air. Two units are lightweight, portable and have built-in water level indicator and power-on indicator lights. They are finished in almond and woodgrain colors.

Model 664 has a 2.5 gallon water capacity and two-speed operation. Suggested retail price is $89.95. Model 663 has a 3.5 gallon capacity and three-speed operation. It also features automatic variable humidity control. Suggested retail price is $109.95.

The Sunbeam Warm Steam Vaporizer, Model 1357, features a one-gallon capacity at a suggested retail price of $14.95. Model 1367 has a one and one-half gallon capacity, plus carrying handles and a suggested retail price of $16.95.

The Sunbeam Cool Spray Humidifier Model 637 has a one-gallon capacity and is permanently lubricated. Suggested retail is $21.95. Model 96 has a two-and-one-quarter gallon capacity, removable air filter, adjustable mist output control and directional mist control. Suggested retail is $33.95.

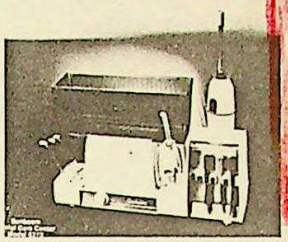
The Sunbeam Dental Care line has been expanded to include two water jets, a rechargeable automatic toothbrush and a combination unit. Model 6280, the Sunbeam Dental Water Jet, has adjustable water pressure range and a see-through reservoir with a suggested retail of $43.95. The Model 6271 Standard Dental Water Jet has a large reservoir, lock-in and slide-out jet tip holder and handle storage. Suggested retail is $51.95. Model 6272, Deluxe Dental Water Jet has flow/pressure control on the handle and carries a suggested retail of $55.95.

A new Rechargeable Automatic Toothbrush activates automatically and features a cordless, rechargable handle with charging stand at a suggested retail price of $29.95.

Model 6273, the Dental Care Center Toothbrush and Water Jet Combo Unit has a suggested retail price of $75.95.

Sunbeam's complete line of heating pads is available in standard and king sizes, moist and dry heat and a selection of lever, pushbutton and multi-heat controls. Suggested retails start at $16.

Specialty heating pads include the Arthro Muff, Hot & Cold Heat Wraps and the Sinus Pad. Suggested retail prices in the group begin at $14.



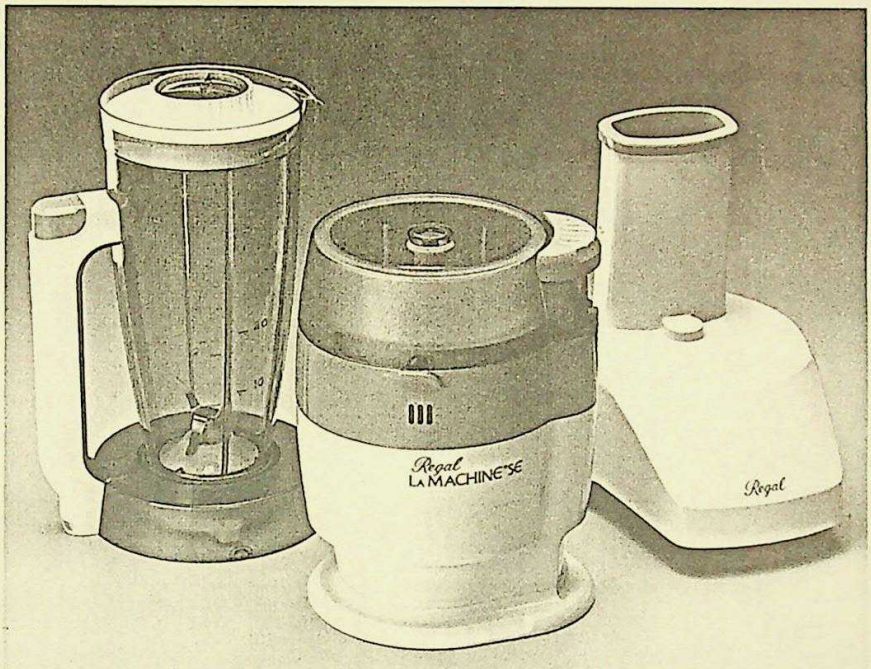
Sunbeam's new Dental Care Center has a suggested retail of $75.95.

Buyer's Club Opens Second Denver Unit

HOUSEWARES® Special Report

AURORA, CO—Buyer's Club, a cash and carry wholesale warehouse operation here, will open its second unit this Fall in Arvada, CO. The 102,000 square foot warehouse will serve the western Denver area.

Buyer's Club President Ken Bagus said that negotiations are being finalized for the building of two additional Denver area clubs, bringing the market total to four. He also reported that the firm will open 10 more units throughout the southwestern U.S. between November 1985 and December 1987.



The food processor that chops, dices, grates, blends and whips the competition.

Our La Machine® SE is a complete food preparation system with features that whip anything in its size and price range.

For example, our processor has a pulse switch. The competition doesn't. Ours has a blender. Theirs doesn't. Ours has a 750 watt direct-drive motor. Theirs doesn't.

Ours even operates more quietly and slices more quickly. And it comes with food processing, chopping and blender attachments all included.

When you compare features and performance, nothing stands up to our La Machine SE with its low profile and low price point.

Quite simply, it's more product for the money than anything on the market today.

See for yourself. Ask your Regal Sales Representative to whip up a little demonstration for you.

McCormick Place

I THINK it's safe to assume that what happens to and with McCormick Place is of interest to the housewares industry. That behemoth of an exposition complex has played a major role in the NHMA's housewares show since 1961, when it opened the original structure with the first trade show ever held.

A few months ago I wrote about the announced expansion plans for the building that would add another 370,000 gross square feet of space on air rights above the railroad right-of-way directly across Lake Shore Drive, with an enclosed pedestrian

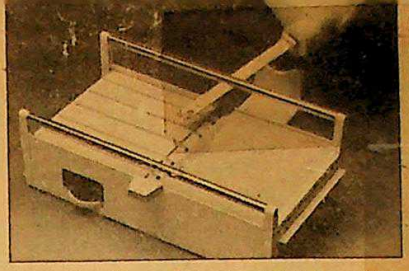
PRESTO INTRODUCES A SHARP NEW IDEA!

It's an electric food slicer—it's an electric carving

from Presto. The Cutup™ knife/slicer. A precision food slicer that adjusts from super-thin to extra-thick, even disassembles in seconds for easy cleaning and storage. The power handle and surgical stainless steel blades make an ideal electric carver for kitchen or table. Nothing like it on the market and just what your customers need. Stock up for active selling.



Power handle and surgical stainless steel blades detach for use as electric carving knife. Like two appliances in one.

PRESTO®

. . . innovation to make it first
quality that makes it last and last®

Another sure-fire success from the folks who make success a habit.

(54)(57) 1. УСТРОЙСТВО ДЛЯ УДАЛЕНИЯ СЛИВНОЙ СТРУЖКИ из зоны обработки токарного станка, содержащее установленный с возможностью вращения на приводном валу и кинематически связанный с ним посредством моментной муфты барабан с прорезями для захода стружки, *отличающееся* тем, что, с целью автоматизации процесса удаления стружки, устройство снабжено средством захвата и подачи стружки в барабан, выполненным в виде установленного с возможностью углового поворота на расположенной параллельно приводному валу оси зубчатого сектора с рычагом, несущим на конце электромагнит, и установленной на барабане с возможностью осевого перемещения втулки с кольцевой проточкой на периферии, предназначенной для взаимодействия с введенной в устройство вилкой, жестко закрепленной на суппорте станка, при этом прорези для захода стружки выполнены на торцовой поверхности барабана.

2. Устройство по п. 1, *отличающееся* тем, что барабан выполнен конусным с углом 3—9°.

(19) SU (11) 1225760 A

Изобретение относится к машиностроению и может быть использовано для удаления сливной стружки при обработке деталей из металлических намагничиваемых материалов на металлорежущих станках.

Цель изобретения — автоматизация процесса удаления стружки.

На фиг. 1 представлено устройство, общий вид; на фиг. 2 — вид А на фиг. 1; на фиг. 3 — сечение Б—Б на фиг. 1.

Устройство для удаления сливной стружки содержит барабан 1, на наружной поверхности которого прорезаны пазы 2, образующие лепестки 3, причем наружная поверхность барабана выполнена с углом конуса, изменяющимся в пределах 3—9° в зависимости от обрабатываемого материала детали, т. е. от угла трения между материалом барабана 1 и материалом обрабатываемой детали. Барабан 1 установлен на приводном валу 4 и кинематически связан с ним с помощью моментной муфты 5.

На барабане 1 размещена с возможностью осевого перемещения втулка 6, снабженная кольцевой проточкой на периферии, предназначенной для взаимодействия с вилкой 7, жестко установленной на суппорте (не показан).

Параллельно оси приводного вала закреплена ось 8, на которой размещен с возможностью углового поворота зубчатый сектор 9, снабженный рычагом 10, на конце которого закреплен электромагнит 11. Устройство размещается на токарном станке, в патронах которого устанавливают деталь 12, обрабатываемую резцом 13.

Устройство работает следующим образом.

В начальный момент рычаг 10 находится в нижнем положении так, что его электромагнит 11 готов захватить конец образующейся стружки 14, а втулка 6 с вилкой 7 занимает крайнее правое положение.

В процессе обработки детали электромагнит 11 захватывает конец образующейся стружки 14 и, поворачиваясь с рычагом 10, протягивает ее через пазы 2 барабана 1, переходя в верхнее положение и отключаясь. При этом включается приводной вал 4, передающий через моментную муфту 5 вращение барабану 1, который своими лепестками 3 захватывает стружку 14 и наматывает на свою поверхность. Одновременно с этим вилка 7, жестко сидящая на суппорте станка, перемещается влево вдоль оси детали с заданной продольной подачей и перемещает втулку 6.

После окончания обработки происходит перемещение суппорта, а вместе с ним вилки 7 и втулки 6 в крайнее правое положение, ввиду чего образующаяся в виде трубки-спирали стружка сдвигается втулкой 6 с лепестком барабана 1 и сбрасывается в специальный лоток. С целью облегчения схода стружки 14 барабан 1 выполнен конусным с углом не менее угла трения между барабаном и стружкой.

При установке очередной заготовки рычаг 10 занимает нижнее исходное положение и вступает в работу в момент начала образования стружки 14.

Использование предлагаемого технического решения позволяет повысить производительность обработки за счет уменьшения вспомогательного времени и автоматизации процесса отвода и удаления стружки.

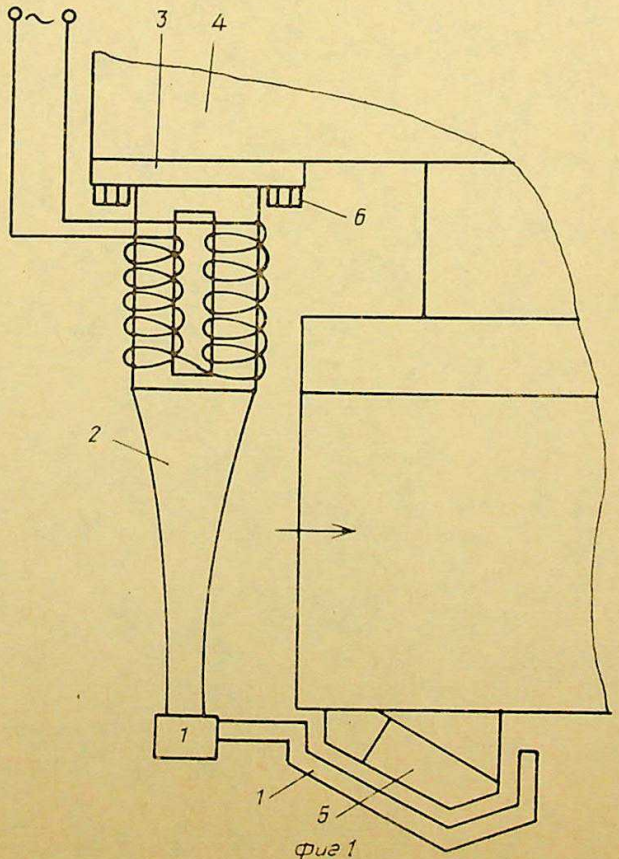
(54) (57) УСТРОЙСТВО ДЛЯ УДАЛЕНИЯ СТРУЖКИ, по авт. св. № 812525, *отличающееся* тем, что, с целью расширения технологических возможностей, устройство снабжено регулируемым вибратором с принудительным приводом возмущения вибраций, установленным на фрезерной бабке станка и связанным исполнительным элементом с рабочей частью элемента для удаления стружки.



Фиг 1

(19) SU (11) 1237382 A 2

Изобретение относится к обработке металлов резанием и может быть использовано при фрезеровании заготовок преимущественно из труднообрабатываемых материалов.

Цель изобретения — расширение технологических возможностей путем использования при обработке заготовок из различного материала с различными режимами резания.

На фиг. 1 представлен пример выполнения устройства, снабженного магнитострикционным вибратором; на фиг. 2 — пример выполнения устройства, снабженного гидравлическим вибратором.

Устройство для удаления стружки состоит из элемента 1 для удаления стружки, связанного через регулируемый вибратор 2 и кронштейн 3 с фрезерной бабкой 4 станка. Устройство установлено с охватом рабочей части фрезы 5 и закреплено на фрезерной бабке 4 болтами 6.

Устройство работает следующим образом. Образующаяся при резании стружка контактирует с зубьями торцовой поверхности элемента 1 для удаления стружки и частично удаляется. Оставшаяся стружка попадает в ограниченный объем, образуемый внутренней поверхностью элемента 1 и рабочей частью фрезы 5, где с помощью регулируемого вибратора 2 осуществляется многократное принудительное колебание пакета стружки, при этом происходит разрушение связи стружка — резец.

Регулировка рабочих характеристик (величины минимального зазора между элементом 1 и режущими кромками фрезы 5 и частоты колебания пакета стружки) устройства осуществляется путем изменения характеристик принудительного привода возмущения колебаний вибратора 2, например, при использовании магнитострикционного вибратора (фиг. 1) силы и частоты тока в обмотках трансформатора, а при использовании гидравлического или пневматического вибратора (фиг. 2) — изменением характеристик управляющего кулисного механизма (плеча кулисы и числа оборотов эксцентрика).

Частота и амплитуда колебания элемента 1 с помощью вибратора 2 устанавливается в зависимости от скорости резания и величины подачи на зуб фрезы 5. С увеличением скорости резания частоту колебания элемента 1 увеличивают. С увеличением величины подачи на зуб фрезы 5 амплитуду колебания элемента 1 уменьшают.

Таким образом, простота регулировки характеристик вибратора обеспечивает возможность эффективной работы устройства по очистке фрезы от стружки при обработке различных материалов в широком диапазоне режимов резания, что способствует увеличению стойкости инструмента.

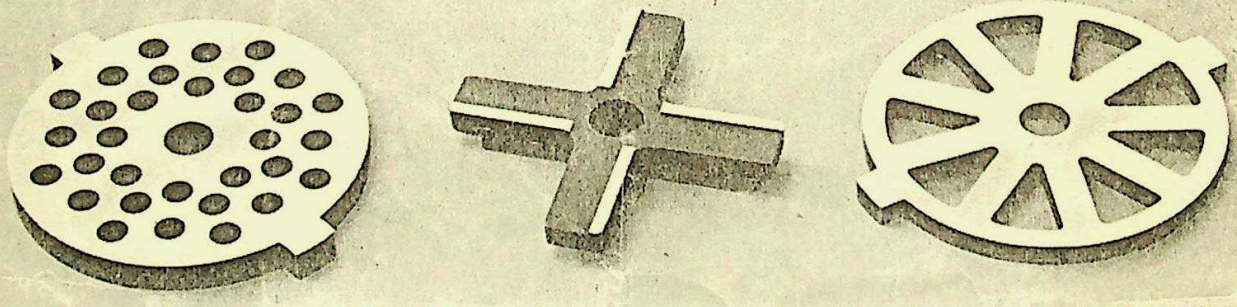
AMPLEX POWDER METAL COMPONENTS PROVE A SHORT CUT FOR LONG GRIND IN OSTER® KITCHEN CENTER™.



The problem: produce complex, close tolerance grinding head components of hardened nickel alloy steel, with zero absorption of juices, odors or bacteria — at relatively low cost.

The solution: Designers of the Oster Kitchen Center food preparation appliance turned to Amplex powder metallurgy specialists with their precision forming capabilities, Amplex responded with nickel steel parts formed from alloy powders, plastic impregnated to eliminate absorption. Parts are aqua-quenched to a file hardness of 50-52 Rc, then ground to precise requirements — including sharpened cutting edges on one part. All at a fraction of the cost of conventional machining methods. For a solution to your complex parts problem that combines quality and low cost, call Amplex Division, Chrysler Corporation, P.O. Box 2718, Detroit, Mich. 48231. (313) 267-3441.
